

Science 10  
Bioaccumulation Research Assignment

Names: \_\_\_\_\_

You will be working in groups of 3.

- Each group member will find one organism (other than an Orca or a Salmon) in which bioaccumulation and biomagnification takes place.
- Complete the following table.

Chemical being biomagnified			
Where is the chemical coming from?			
Through which organisms is it being bioaccumulated?			
What is the potential impact to humans?			
What is the potential impact to the environment?
