Fractions Review

Rate Yourself!

Lowest Terms

I am an expert! I can do this all without a calculator	I get this, but sometimes have problems deciding what to divide by. I might need a calculator	I'm still not very confident about reducing to lowest terms
---	---	---

Equivalent Fractions

I could teach people how to do this! It is just as easy as walking and talking. I can do this without having to write the numbers down	I get this, but sometimes might need a calculator.	I'm still not sure how to make equivalent fractions. I should probably write down the fractions so I can visualize it better
---	--	--

Adding or Subtracting Fractions

This is easy. I can determine Common Denominators without writing them down, and can visualize the equivalent fractions with no problem.	I sometimes am not sure how to get the common denominator. I have some problems making the equivalent fractions.	I'm having a great deal of difficulty adding fractions that do not have a common denominator
--	---	--

Overall: How ready do you think you are to move on to the next part of fractions? What parts do you think you are good at and what parts do you need more help with?
